

**Hardis Group is implementing its Reflex WMS solution at bol.com.**

Reflex WMS (Warehouse Management System) solution has been chosen for bol.com's new fulfilment centre currently under construction in Waalwijk.

Since its launch in 1999, bol.com has been one of the most popular online stores in the Netherlands and Belgium with 6,5 million customers. It offers about 14 million products in dozens of speciality stores for books, music, film, electronics, toys, jewellery, watches, baby products, gardening and DIY tools, pets, sport, leisure and personal care. In 2016 bol.com was chosen by experts as the 'Best Web Shop of the Netherlands'. And in 2015 and 2016 bol.com won the audience awards 'Best online department store of the Netherlands' and 'Best webshop of Belgium'. Bol.com is a subsidiary of Ahold Delhaize.

Reflex WMS has already been successfully implemented in one existing location. Its implementation for the large new distribution centre is underway.
