### **Voiteq joins Hardis Group's ecosystem of voice partners**

**Following the major mergers and acquisitions which have reshaped the industrial voice-recognition market in recent years, Hardis Group has chosen to partner with Voiteq due to its expertise in voice-recognition solutions across all technologies and its ability to address international-scale projects.**

Grenoble, June 29, 2016 – Hardis Group, a digital services company and software publisher, announces its partnership with Voiteq, a global provider of voice-directed work solutions. An agreement with a company able to integrate solutions based on Vocollect, TekSpeech Pro or any other voice-recognition technology into Reflex WMS and provide long-term maintenance.

For several years now, Hardis Group's Reflex WMS software has included voice-recognition solutions applicable to all warehouse management processes. In response to the successive waves of concentration in the voice-recognition market and in order to continue providing its customers with a high-quality service and expand its software and hardware offering, "Hardis Group chose an agnostic integrator able to work with all the technologies in the market," explained Jean-Yves Costa, Deputy Manager of Supply Chain Solutions at Hardis Group.

Voiteq is a major player in the voice solution integration market, with over a hundred employees dedicated to the supply chain sector and 23,000 users throughout the world at over 320 sites. The company provides a connector which is able to interface Reflex WMS with Vocollect, TekSpeech Pro or other voice-recognition technologies. For Hardis Group, this means being able to provide its customers with voice-recognition solutions based on combining any software with any terminal.

With offices in the USA, UK, Germany and France, Voiteq can help Hardis Group with its international-scale Reflex projects.

This partnership is in addition to Hardis Group's agreements with its long-standing partners in the field of integration and maintenance of voice solutions associated with Reflex.

#### **About Voiteq**

---

Voiteq is a global provider of voice solutions. For 15 years, the company has been helping customers to reap the benefits of hands-free, eyes-free working with solutions that make operators' tasks easier, increasing their productivity, minimizing mistakes, optimizing customer service and achieving significant economies of scale.

With offices in the UK, France, Germany and North America, Voiteq has the largest number of voice technology-certified specialists in the world.

**About Hardis Group**

---

Hardis Group, a digital services company and software publisher, assists its customers in the transformation of their business model, their Supply Chain and their Information system. The company helps them become more competitive and increase their operational performance, creating and integrating business, technological and digital solutions tailored to their needs and issues.

With its dual positioning, Hardis Group has developed expertise in the areas of banking, insurance and e-health, distribution (CPG and luxury goods), industry and energy, logistics and transport services. This expertise now allows it to provide global responses, in an agile approach characterized by co-construction, innovation and continuous improvement.

Since its creation in 1984, the company has built its growth on a pragmatic approach and values of efficiency and firm commitment both to its 2,500 clients and its 730 employees (25% of whom are also shareholders). In 2015, Hardis Group achieved a turnover of € 68.8 million. The Group has five offices in France: Grenoble (head office), Lyon, Paris, Lille and Nantes.
